Allowable Subject Matter

1. Claims 1-7 and 30 are allowed.
2. The following is an examiner's statement of reasons for allowance: claim 1 is allowable over the art of record because the prior art does not teach or render obvious the entire combination including specifically a capacitance measurement circuit comprising means coupled to a capacitance measurement section for providing a capacitance value of a second capacitance component by calculating the outputs of the first to third current detectors.

Claims 2-7 and 30 are allowable as their base claim is allowable for the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huang et al. (6,870,387 B2) discloses test structures for measuring interconnect coupling capacitance utilizing measuring a coupling capacitance (C_c) using currents I_1 and I_2 (Column 6, equation on line 63). Suaya et al. (6,934,669 B1) discloses a capacitance measurement circuit which allows simple computation of total capacitance and cross coupling capacitance.
